

THE PARTWORK PARTNER

COMPANY PROFILE

LEONI started in 1989 as a company specialized in design and production of promotional items.

Over the years LEONI has increased its competence and versatility through the use of highly skilled internal and external cooperators, becoming a leading company for 3D figurines and scale model kits area.

LEONI quality policy has been developed to reach and fulfill the following objectives:

- To study and analyze its customer business area on the global market in order to propose strategically winning ideas
- To always provide the best items possible, both in terms of quality and appeal. This through use of selected reliable suppliers with whom LEONI has already developed years-long relationships.
- To provide utmost attention to customers' needs during each project definition and development, in order to help and indicate the most appropriate solution for any possible question or problem
- To pursue total transparency with its customers through clear and complete definition of all supply's details
- To ensure, in case of toys, absolute compliance to safety standards and regulations
- To fulfill customer demands without mistakes
- To guarantee agreed delivery time
- To solve any possible customer complaint fastly and efficiently

OUR JOB

To ensure the highest quality of its products, LEONI (ISO 9001 certified), relies mainly on foreign companies with same standards and principles. Moreover, all our products are manufactured in full compliance of REACH regulations

In order to verify its products quality, all items produced by LEONI are tested and approved either by the Toy Safety Italian Institute or by TUV, ensuring that shape, functions and raw materials used are conform to limits imposed by european or foreign regulations.

Guaranteed quality on products made by LEONI is implemented through strict controls of its suppliers productive process. This through local checkings carried out by delegated members during production process (DU-PRO) and with final inspections that verify status of goods at the end of the production and before shipment (Final Inspection).

Shipping department is able, if requested by customer, to follow in real time transportation of goods and the transition from Chinese factories, up to customs clearance and delivery to the designated warehouses.

LEONI ASIA Ltd.

In order to further strengthen its service and to have direct support in China, LEONI has a side office in Hong Kong: LEONI ASIA Ltd.

This company has been established to coordinate internal inspections and enhance sourcing of new products and suppliers as well as to serve as sidekick office to better follow development of all the various projects.

PICK & PACK

Pick & Pack is a LEONI partner company specialized in packaging of different types of goods. Its goal is to finalize in Italy gadgets produced in China along with publishing material and final packing.

Pick & Pack is fully capable to process goods under foodgrade requirements, as well as to handle packaging and reconditioning of products returned from kiosks and planned to be sold again. It has flow pack machines that can handle formats even larger than A4.

Its specialized workers are able to handle many types of machining operations, even unusual kinds of packagings.

ORGANIZATION

LEONI operative staff is organized into different thematic sections, handling all productions in the full respect of the applicable material quality/safety requirements:

- **General Partwork**

Handling different kind of long-term kiosk Partworks – ranging from plastic 3D figurines, polyresin characters to metal figurines – and one shot / mini Partwork for weekly magazines. Given the large scale of possible requests in terms of subjects and materials, the office is organized into a *die cast section* (scale reproductions of cars, airplanes etc. in metal alloy), *figurines* (plastic materials, metal alloys and polyresin) and *generic partwork section* that combines with periodicals.

- **Food Section**

Specialized in everything that involves the creation of gadgets for the food industry. The use of adequate materials and packaging that respect the principle of non-contamination of the combined products (odor barrier) are the key principles on which this section is based.

- **Flowpack and Loyalty Section**

It deals with all newsstand campaigns, unrelated to a dossier or magazine and instead sold in a bag and display-box, and large Loyalty and Special and Short campaigns. The constant research of new objects or materials and the immediate responsiveness to requests are the real strengths of this section.

- **MADE IN ITALY section**

It is a structure that operates completely in Italy and takes care, internally, from the design to the production and packaging of large promotional and loyalty campaigns. Having a very short supply chain and a complete automatism, it is able to produce huge quantities with short notice. It's great for special and short promotions where the promptness of reaction is fundamental.

In addition LEONI Quality and Logistics Department is supporting the operative staff to complete the production cycle taking care of the safety/inspections/logistic matters.

A large, dynamic yellow brushstroke graphic that sweeps across the middle of the page, partially obscuring the company name.

LEONI S.p.A.
